Office Action Summary	Application No. 10/642,399	Applicant(s) SHAOLIAN ET AL.	
	Examiner Eduardo C. Robert	Art Unit 3732	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Invention III (claims 13-18), Species II (Figures 4, 4A and 4B) and Sub-Species D (Figure 2e) in the reply filed on April 20, 2005 is acknowledged.

It is acknowledged applicant believes that claims 13-18 read on the elected Species and Sub-Species. The examiner agrees with applicant.

Claims 1-12 and 19-45 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on April 20, 2005.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 13 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Navas (U.S. Patent No. 5,540,688).

Navas discloses a device (see Figure 2 below) comprising bone anchors 2 and 2' having head. The head of the anchor 2' includes a portal with two notches 2'f (see Figure 2 below). The

Art Unit: 3732

device further includes a first segment of a rod extending through the portal and the first segment defines a first surface. The device also includes a locking cap 3 and a second segment of a rod having a second complementary surface (see Figure 2). The locking cap 3 fix the first segment within the portal and the angular relation of the joint.

Fig. 2

Claims 13 and 15-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Ferree (U.S. Patent No. 6,802,844).

Ferree discloses a device (see Figure 3A below) comprising bone anchors, e.g. 20 and 40, each with heads (see Figure 3A below). The heads include a portal (see Figure 3A below). The device further includes a first segment of a rod extending through the portal and the first segment defines a first surface. The device also includes a locking cap and a second segment of a rod having a second complementary surface (see Figures 3A and 3H below). The locking cap fix the first segment within the portal and the angular relation of the joint.

The device can includes multiple segments of a rod, for example, a third segment having a socket can be connected to the rod which has the first segment (see Figure 3H above). The segments of the different rod have the ability to be secured to an insertion tool. With regard the statement of intended use and other functional statements, they do not impose any structural limitations on the claims distinguishable over Ferree which is capable of being used as claimed if one so desires to do so. *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). Furthermore, the law of anticipation does not require that the reference “teach” what the subject patent teaches, but rather it is only necessary that the claims under attack “read on” something in the reference. *Kalman v. Kimberly Clark Corp.*, 218 USPQ 781 (CCPA 1983). Furthermore, the manner in which a device is intended to be employed does not differentiate the claimed apparatus from prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

Allowable Subject Matter

Claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 for art cited of interest.
